

Enjoy life, bug free!

Drunk'n Mosquito®

Eco-Friendly Insect Repellents

Wholesale Guide

About Drunkn' Mosquito

In business over 10 years!

We value authentic relationships and healthy enjoyment of the outdoors. That's why we create eco-friendly insect repellants! Disconnect from the busy and hurry of the world and reconnect with your relational roots and the simplicity of nature, bug free! Whether you're camping, hiking, hosting a cookout or on the go Remember your Drunk'n Mosquito!

Everything about our products are handmade and purposeful, from our eco-friendly ingredients to our versatile containers that can be reused or recycled. Our decorative glass & rugged aluminum citronella candles are the perfect addition to any outdoor event. These working candles are hand-poured to the perfect level in order to maximize wind-protection & effectiveness. Made with 100% pure soy wax, each candle burns incredibly long, averaging 10-12 hours of burning per ounce. For example, our 8 oz. travel tin burns approximately 100 hours!

Our bug spray, which contains the same great eco-friendly ingredients can be applied directly to you, your family, dogs, horses and farm life to provide instant protection for approximately 4 hours!

Drunk'n Mosquito is registered under 25b products with the Michigan Department of Agriculture.

Activities for use include, but aren't limited to....

How-To Use Drunk'n Mosquito

How to Burn Your Drunk'n Mosquito Citronella Candle

For First Burn Only: Burn candle until it has liquefied completely to edge of jar (approx. one hour burn time for each inch of diameter of jar). Failure to do so may result in core burn.

For Outside Use: Place the candle on or near the ground, that's where the bugs are! Light approximately 20 minutes in advance so the scent can rise and fill an area of approximately 15 feet.

Soy Citronella Candle Ingredients: Lime citronella, lemongrass, citronella, vanilla bean, lemon eucalyptus and 100% pure soy wax

How to Apply Drunk'n Mosquito Bug Spray

Shake before using. Apply generously to clothing and rub on skin every four hours or as needed. Apply on hand & wipe on face. Avoid direct contact with mouth and eyes.

Spray Ingredients: Lime citronella, lemongrass, citronella, vanilla bean, lemon eucalyptus, distilled water, glycerin and witch hazel.

F.A.Q's About Our Products

Why choose Drunk'n Mosquito?

Our products are meant for those who want to enjoy the outdoors, bug free, while being kind to the environment.

Who can use Drunk'n Mosquito?

Our products are safe for the whole family! Though we do not recommend using on infants six months or younger, due to unknown allergies.

All of our ingredients are approved for use by the American Kennel Club and are great for dogs. Our bug spray can also be used on horses, and farm-life. Do not use on cats, as they are allergic to citronella and citrus-based sprays.

What makes your ingredients Eco-friendly?

We pride ourselves on using the finest ingredients. We use 100% pure soy wax and all-cotton wicks, allowing our candles to burn long (10- 12 hours an ounce) and burn clean (no additives). For example, our 8-ounce soy citronella candle burns approximately 100 hours!

We also use the highest quality blends of phthalate-free essential oils that are safe for humans and animals. The oils we use are in compliance with and approved by the International Fragrance Association (IFRA). Our sprays contain carriers of distilled water, glycerin and witch-hazel and all of our containers are recyclable or reusable.

Do Drunk'n Mosquito candles & sprays have a shelf life?

Yes, our candles and bug sprays have a shelf life of at least two years, though we have customers who have been using the spray 3-4 years with the same great result!

Is the bug spray waterproof or SPF rated?

Our bug spray is not waterproof, but does have a SPF 4 rating.

Why are Drunk'n Mosquito candles only filled half-way?

Everything about our products are purposeful. Our citronella candles are poured half-way to serve as a natural wind barrier that helps maximize protection and minimizes relighting for you!

What is the burn radius for the candle?

All of our candles have a burn radius of approximately 15 feet, which is determined by the diameter of their container. We recommend placing each candle as close to the ground as possible so the fragrance can rise up and form a bug-free barrier!

What insects does Drunk'n Mosquito repel?

Gnats, ticks, fleas, black flies, fruit flies, no-see-ums, horse flies and mosquitoes!

What kind of wax & oil do you use in Drunk'n Mosquito products?

We use 100% pure soy wax in our candles. We use the same premium blend of essential oils in both our candles and sprays. The oils we use are in compliance with and approved by the International Fragrance Association (IFRA).

Does Drunk'n Mosquito really work?

YES! In our 13th year of business, we are proud to serve you a product that continues to keep families, dogs and farm life bug free. Our success would not be possible without the support of our customers. We've grown our business by participating in Michigan based events yearly, by maintaining relationships with over 80 wholesale partners (and growing), and gaining nationwide customer support through our Etsy storefront.
